

## 1995 ANNUAL INDEX

Articles are divided by subject matter, then listed chronologically with authors, issue month, and page. All page numbers beginning with an "S" refer to a supplement with a limited distribution.

### FEATURES

#### Bonding/Dicing

Putting vision-based process control on-line  
Larry Schmitt, Doug Davidson — July 139

#### Cleaning/Stripping

Removal of hard masks in semiconductor processing  
J. Rembetski, W. Rust, R. Shepherd — Mar 67  
Trends in wafer cleaning technology  
Takeshi Hattori — May 57  
Mechanical brush scrubbing for post-CMP clean  
Wilbur Krusell, John de Larios, Jackie Zhang — June 109  
The IMEC clean: A new concept for particle and metal removal on Si surfaces  
M. Meuris, P.W. Mertens, A. Opdebeeck, H.F. Schmidt, M. Depas, G. Vereecke, M.N. Heyns, A. Philipossian — July 109  
Damage reduction in dry resist stripping systems  
J. Shi, M. Kamarehi, D. Shaner, S. Rounds, S. Fink, D. Ferris — Oct 75

#### CMP

Emerging developments in CMP for semiconductor planarization  
Michael Fury — Apr 47  
Particle detection on post-CMP films  
Thomas Larson, Rebecca Howland, Stan Stokowski — May 522  
Emerging developments in CMP for semiconductor planarization — Part 2  
Michael Fury — July 81

Post-tungsten CMP cleaning: Issues and solutions  
T. Myers, M. Fury, W. Krusell — Oct 59

#### Contamination Control

Effect of exhaust stability on fume capture performance  
Rod Magee — May S15  
Stainless steel for high-purity gas filter assemblies  
William Murphy, Barry Gottinsky — May S18  
Gas phase contaminants and their effects on MOS structures  
S.E. Beck, M.A. George, D.A. Bohling, B.J. She-manski, R.G. Ridgeway, G.A. Hames, J.J. Wortman, W.A. Lanford — June 69  
Particle measurement in specialty gases  
James Hart, Wayne McDermott, Arthur Holmer, James Natwora — Sep 111

#### Deposition

Interconnect metallization for future device generations  
Bruce Roberts, Alain Harrus, Robert L. Jackson — Feb 69  
Advanced process simulation of metal film deposition  
Cameron Sorlie, Michael Brett, Steven Dew, Tom Smy — June 101  
Integrated CVD titanium and titanium nitride processes for sub-0.5- $\mu$ m metallization  
J. Hillman, R. Foster, J. Faguet, W. Triggs, R. Arora, M. Amoen, F. Martin, C. Arena — July 147  
Silicon nitride growth in a high density plasma system  
C. Appleby, M. Gonzales, J. Barbour, L. Gonzales-Petersen, M. Kovacs, B. Kuhr — Nov 73

#### Etch

The treatment of organic chlorides from plasma etch processing  
Derek Baker, Peter Mawle, Bob Smith — Mar 79  
High-density plasma etching 0.35- $\mu$ m polysilicon gates  
Robert Kraft, Scott Prengle — Aug 57

#### Fabs

The future fab: Changing the paradigm  
Paul Castrucci — Jan 49  
The fab of the future: Technology leaders plot roadmap strategy  
R. Doering, D. Markle, P. Borden, L. Schmitt, C. Gwyn, D. Tolliver, G. Roberson — Jan 60

#### Flat Panel Displays

Automated optical inspection and test of active matrix liquid crystal arrays  
Chris Chinnock — Apr 75  
The art and science of thin-film coating: a progress report  
Peter Haaland, James McKibben, Michael Parodi — Apr 83  
Diamond-based field emission flat panel displays  
Nalin Kumar, Howard Schmidt, Chenggang Xie — May 71  
Robotics in automated process tools for the FPD fab  
James Cameron — June 87  
Production and control of vacuum in field emission flat panel displays  
P.H. Holloway, J. Sebastian, T. Trotter, H. Swart, R.O. Peterson — Aug 47  
Tradeoffs in panel designs for cell testing  
Francois Henley, Rudy Mui, Daniel Scott, James Speedy — Aug S17  
Gases/Gas Handling  
Point-of-use arsine generation may foreshadow future methods  
Tom Adams — June 117  
Toxic gas regulations and recommended monitoring  
Long Pham, Duyen Pham — July 125  
Diagnostic procedures facilitate the solving of gas flow problems  
David Sheriff — Aug 63  
Engineering practices improve safety in the use of silane  
M. Visokev, J. Mosovsky, C. Lichtenwalner, J. Valdes, T. Rogelstad — Oct 99

# Microolithography WORLD

A PennWell Publication

*Microolithography World* is the only commercial journal devoted exclusively to keeping you current on highly specialized microlithography industry developments. *MLW*, published in cooperation with SPIE, brings you current, high-level scientific and engineering articles written by experts, as well as industry news from around the world. Stay abreast of key industry trends and events by subscribing to *Microolithography World* TODAY!

Yes! I want to receive *Microolithography World*. Please send information on a preferred reader subscription at the rate I've indicated below, for one year (four issues).

## 1995 ANNUAL INDEX

### Gases/Gas Handling continued

Maintaining ultraclean gas-system integrity for toxic and hazardous gases  
J. Cestari, M. Yelverton — Oct 109  
Specialty gas delivery requires attention  
S. Krishnan — Oct S3  
Delivering hydrogen to meet <1 ppb impurity levels without the use of purifiers  
A. Homayk, S. Ketkar, B. Shemanski — Oct S5  
Site-specific corrosion in gas delivery tubing exposed to semiconductor grade HCl  
S. Krishnan, S. Grube, O. Laparra, A. Tudhope — Oct S11  
Corrosion-free  $\text{Cr}_2\text{O}_3$  passivated gas tubing system for specialty gases  
T. Ohmi — Oct S18  
Analysis of condensable corrosive gases for metals contamination  
M. Conroy, S. Stanesco, R. Rosenberg — Oct S23  
Use of expert systems for data validation in UHP gas analysis  
M. Malczewski — Oct S28  
Modeling moisture transport in UHP distribution systems  
Benjamin Jurcik, Aras Norvilas — Nov 115

### Implantation

Using SIMS to detect contamination sources from ion implanters  
F.A. Stevie, R.G. Wilson, D.S. Simons, M.L. Current, P.C. Zalm — May 51

### Lithography

Extending optical lithography to the gigabit era  
M. David Levenson — Feb 57  
Extending optical lithography to 0.25  $\mu\text{m}$  and below  
Joseph Langston, Giang Dao — Mar 57  
0.25- $\mu\text{m}$  lithography using 248-nm step-and-scan technology  
Gerald Elder, Lloyd Litt, John Maltes — June 51  
193-nm lithography at MIT Lincoln Lab  
Michael Hibbs, Roderick Kunz, Mordechai Rothschild — July 69  
Electron beam imaging and metrology of 0.25- $\mu\text{m}$  lithography  
Kevin M. Monahan — Aug 71  
DUV lithography and beyond  
M. David Levenson, Peter Silverman, Richard George, Steef Wittekoek, Phillip Ware, Chris Sparkes, Larry Thompson, Paul Bischoff, Allan Dickinson, John Shamaly — Sep 81  
Critical-dimension and overlay metrology: a review  
T. Bosworth, J.-C. Fouere, N. Smith — Sep 119  
Comparison of simulated and experimental CD-limited yield for a submicron *i*-line process  
Edward Charrier, Chris Mack, Christopher Progler — Nov 105

### Materials

SOI substrates for low-power LSIs  
A.J. Auberton-Hervé, B. Aspar, J.L. Pelloie — Mar 87  
Organic polymers for IC intermetal dielectric applications  
Neil Hendricks — July 117  
Integrating dielectrics into sub-half-micron multilevel metallization circuits  
Dipankar Pramanik — Sep 69  
Microtexture analysis in aluminum thin films  
David Field, David Dingley — Nov 91  
A new capacitor technology based on porous silicon  
V. Lehmann, W. Hönlein, H. Reisinger, A. Spitzer, H. Wendt, J. Willner — Nov 99

### Micromachining

3D structures for micro-system technology using proximity lithography  
Elmar Cullmann, Bernd Löchel, Gunter Engelmann, Constant Reyerse — Mar 93  
Can micromachining deliver?  
Louis Vintro — Apr 57

### Multichamber Processing

Advanced process and equipment monitoring with a quadrupole mass analyzer  
Robert Waits — Jan 73  
Development of a MESC-compliant cluster tool  
J. Lee, W. Jang, B. Choi, H. Yoo, S. Park — Oct 93

### Packaging/Assembly

Die attach materials and methods  
Steve Trigwell — Apr 63  
Photoimageable BCB technology lowers costs for MCMs  
Rick Foster — June 125  
Novel snap cure die attach for in-line processing  
Art Burkhart, Michael Grosse, My Nguyen — June 133  
Adhesion issues in electronic packaging  
L.J. Matienzo, F.D. Egitto — July 99  
Simulation tool enhances integrated-circuit encapsulation  
T.H. Kuah, P.H. Yeung, C.J. Vath III, K.Y. Hung — Nov 83

### Photomasks

Elusive mask defects: Coincident CD and edge defects  
James Reynolds — Jan 81  
Elusive mask defects: The false defect  
James Reynolds — Feb 81  
Elusive mask defects: Reflectivity variations  
James Reynolds — Mar 75  
Detecting elusive mask defects  
James Reynolds — June 121  
Edge detection strategies for sub-0.5- $\mu\text{m}$  reticle metrology  
Mircea Dusa, Linard Karklin — Sep 101

### Photoresist Processing

Trends in track system architecture  
Michael Biché — May 83

### Plasma Processing

Intermetal dielectric processing productivity using high density plasma deposition  
J.T. Pye, H.W. Fry, W. Schaffer — Dec 65

### Processes

Processes of the future: Updated Roadmap identifies technical, strategic challenges  
Dirk Bartelink, John Martin, Judson French, Richard Stulen, Ray Kerby, Robert Kee, William Houf, Paul Spence, Peter Verhofstadt, Don Wolleson — Feb 42

### Resists

Antireflective coatings - An overview  
Thiloma Perera — July 131

### Software

Defect-data management system at SEMATECH  
Harish Singh, Fred Lakhani, Paul Proctor, Amy Kazakoff — Dec 75

### Test/Measurement

A systematic approach to wafer level reliability  
Jay Shideler, Timothy Turner, James Reedholm, Cleston Messick — Mar 47  
A combined spectroscopic ellipsometer and spectrophotometer  
J.J. Estabil, M. Keefer — Apr 71  
Oxygen, carbon, and nitrogen quantification by high-energy resonance backscattering  
Jian Li, F. Moghadam, L.J. Matienzo, T.L. Alford, J.W. Mayer — May 61  
An integrated system for rapid process defect evaluation  
Y. Uritsky, C. Cai, T. Francis, J. Xu, G. Lum, B. Worster — June 61  
Monitoring electrically active contaminants to assess oxide quality  
Gregory Horner, Meindert Kleefstra, Tom Miller, Michael Peters — June 79

## MICROMACHINING

### RESONETICS

*is Leading the Way !*

- Fully Integrated Laser Systems
- In-House Production - Clean Room Facility
- Professional Services
- Beam Delivery and Optics

100  $\mu\text{m}$  features etched in polyimide

90  $\mu\text{m}$  dia by 40  $\mu\text{m}$  deep blind hole in ceramic

*Drill Holes to < 2 Microns!*

## 1995 ANNUAL INDEX

Test/Test Measurement continued

A new minority-carrier surface lifetime technique  
Charles Kohn, William Goldfarb — June 93  
Scanning probe techniques for the electrical characterization of semiconductor devices  
J.A. Dagata, J.J. Kopanski — July 91  
Mobile ion monitoring by simultaneous triangular voltage sweep  
L. Stauffer, T. Wiley, T. Tiwald, R. Hance, P. Rai-Choudhury, D.K. Schroder — Aug 53  
Optical characterization of amorphous and polycrystalline silicon films  
E. Ibok, S. Garg, G. Li, A. Forouhi, I. Bloomer, J. Ager III — Aug 511  
Imaging material defects on wafer surfaces  
S. Wolter, M. Ferrara, K. Welch — Oct 85  
High-speed detection of pattern defects using laser scattering  
Rebecca Howland, Keith Wells, Brian Trafas — Nov 123  
Critical dimension atomic force microscopy for 0.25- $\mu$ m process development  
Guy Vachet, Michael Young — Dec 57

### Thin-Film Technology

Giant magnetoresistance for tomorrow's hard drives  
Katherine Derbyshire, Ed Korczynski — Sep 57

### Vacuum Technology

A compact oil-free rough vacuum pump  
Eckhard Bez — Feb 85  
Vacuum ultraviolet substrate cleaning and etching  
L. Allen, J. Grant, T. Nguyen, K. Valiev, L. Velikov, B. Meshman — May 77  
Helium leak testing applications and techniques  
John Tkach — Oct 67

## DEPARTMENTS

### EuroFocus

Why all the action in Europe?  
Andrew Starling — Nov 52  
Eastern Germany breathes new life into wafer fabs  
W. Conard Holton — Dec 42

### Market Watch

Deep pockets needed in the photoresist industry  
M. David Levenson — Jan 32  
1995 outlook is for growth, but slowdown is looming  
Clark Fuhs — Feb 32  
Trends in the mask industry  
Edward Grady, David Kettering — Mar 32  
Companies pursue diverse strategies in mix-and-match lithography  
M. David Levenson — Apr 34  
US equipment suppliers can succeed in Japan  
Masataka Tsubo — May 42  
Assembly and packaging equipment overview  
Subash Khadpe — June 42  
Emerging technologies alter fab chemical consumption  
Robert Castellano — July 54  
MCM market growth attracts competition from former captives  
Ed Korczynski — Aug 36  
A year later, CMP market has grown even hotter  
Michael Martinez — Sep 44  
Lack of manufacturing know-how is slowing the MEMS revolution  
F. Maseeh — Oct 50  
GaAs chips compete in a comfortable niche  
Ed Korczynski — Nov 58  
Semi markets: Stable, even faster growth  
Vladi Catto — Nov 64  
Boom in used fab equipment offers cost savings to buyers  
Laura Peters — Dec 48

## 1995 ANNUAL INDEX

continued

### Policy/Consortium Update

New congress may cut funding for technology work

Peter Dunn — Jan 42

**The SIA's Roadmap: Consensus for cooperation**  
Robert Burger, James Glaze, Tom Seidel, Owen Williams — Feb 38

**Keiretsu, equipment, and materials: A strategic US response**

Ross Young — Mar 38

**SIRIJ: Japan's IC think tank will propose US-style cooperation**

Peter Dunn — Apr 40

**US Display Consortium: Changing of the guard**

Peter Dunn — May 46

**Grenoble: The heart of French IC research**

Peter Dunn — June 46

**Russian government encourages establishment of domestic wafer fabs**

Peter Dunn — July 60

**NJIT's academic fab line is a resource for industry**

Peter Dunn — Aug 42

**Univ. of Michigan Display Center focuses on FPD manufacturing issues**

Peter Dunn — Sep 52

**SEMATECH's 193-nm symposium raises hopes for optical lithography**

M. Levenson — Oct 54

**SEMATECH plans Virtual Bank to fund lithography research**

Peter Dunn — Nov 66

**OTA critique of NFPDI**

Katherine Derbyshire — Nov 68

**Malaysia is poised for leap into semiconductor production**

Peter Dunn — Dec 52

### Industry Insights

**Wafer fabrication operations: A strategy for success**

Steve Berry — Jan 96

**Dramatic process changes will have to prove their worth**

Paul Bakeman, Jr. — Feb 120

**Sub-half-µm fab evolution: A European company's view**

Joel Monnier — Mar 136

**The re-engineering of a trade association**

William Reed — Apr 120

**SEMATECH's whole-factory view**

Sam Harrell — May 128

**Advances in photoresists will require coordinated university research effort**

Grant Willson, Daniel Herr — June 200

**Cluster tool modular communications: A flexible framework for cooperation**

Martin Hansmann — July 248

**300-mm conversion: Everyone must benefit**

Stan Myers — Aug 112

**The people crunch**

C. Douglas Marsh — Sep 164

**Software tools for metrology must look at the big picture**

T. Sherby — Oct 192

**A CEO against "corporate welfare"**

T.J. Rodgers — Nov 192

**Second-source suppliers fulfill a necessary function**

Dan Hacker, Rich Kulkaski — Dec 140

### OWNERSHIP STATEMENT

Statement of Ownership, Management, etc., of

### SOLID STATE TECHNOLOGY

October 2, 1995

(This statement is published in compliance with the Act of October 23, 1962.)

Published monthly, Tulsa, OK

Publisher: Robert C. Haavind, Nashua, NH

Editor: Robert C. Haavind, Nashua, NH

The owner is Advanced Technology Division,

Nashua, NH, PennWell Publishing Co.,

1421 S. Sheridan, Tulsa, OK

Stockholders holding 1 percent or more of total amount

of stock of PennWell Publishing Co.: Successors to estate

trust of Helen B. Lauinger of Tulsa, OK. Known stock-

holders, mortgagees, and other security holders holding

1 percent or more of the total amount of bonds, mort-

gages, or other securities: None.

The average number of copies of the publication during

the twelve months preceding the date shown above is:

Printed: 48,045; paid and/or requested subscriptions by

mail: 43,665; total paid and/or requested circulation:

43,774; free distribution including samples by mail, car-

rier, or other means: 2,356; total distribution: 46,130; of

office use, left over, unaccounted, spoiled after printing:

1,915; total above: 48,045. Actual number of copies of single

issue published closest to filing date: Printed: 48,461;

paid and/or requested subscriptions by mail: 43,182; total

paid and/or requested circulation: 43,290; free distribution

including samples by mail, carrier, or other means:

2,895; total distribution: 46,185; office use, left over, un-

accounted, spoiled after printing: 2,276; total above: 48,461.

I certify that the above statements made by me are

correct and complete.

Robert C. Haavind,

Publisher

## YOUR SILICON BASED SENSORS REQUIRE WAFER SUBSTRATES THAT ARE:

- Flat: TTV as low as 1 micron
- Accurate: Surface and reference flat orientation within 10 minutes of arc (±0.2 degrees)
- Precise: Wafer-to-wafer thickness repeatable to ± 5 microns

Double side polished wafers in research or production quantities in 4 weeks or less. Contact:

### SEMICONDUCTOR PROCESSING COMPANY
